

Lebo Leshabane - Chief Executive Officer

About Me:

I'm a Civil Engineer and have been actively serving in the industry for the last 17 years. I joined iX engineers as the CEO in 2016.

Company Profile and Services:

iX engineers provides infrastructure solutions in the transport, water & sanitation, smart cities, mining, energy digital markets, delivered through specialised engineering, project management, cost control and financial management. We have a team of about 200 multi-disciplinary, built environment professionals.

Favourite Project and most challenging aspects?

St Helena Airport is located on one of the most geographically isolated islands in the world (middle of Atlantic, 2500km west of Luanda, Angola). The remoteness, logistics of materials supply, unique geology, terrain and climate together with the endemic biodiversity with the island's fragile environment required innovative design and meticulous care.

Clients & Projects you are working with or have worked with:

SANRAL - Rehabilitation of N2, Section 22 between Murchison to Marburg - responsible for the design and construction supervision.

Bombela Civils Joint Venture - Gautrain Rapid Rail Link - with WS Atkins International, iX were appointed for the preliminary and detailed design of the South-North Section.

City of Tshwane - Zeekoegat Waste Water Treatment Works, upgrade and expansion of the plant.

Assmang Khumani Iron Ore - Assmang's Khumani Mine Water Resource Augmentation.

City of Cape Town - Temporary Sea Water Reverse Osmosis Desalination plants. iX investigated and implemented these plants. As well as the development of the Cape Flats Aquifer well fields in multi clusters.

Advice to Future Professionals?

They must continue to learn and adapt to new technologies that continue to disrupt our sector. They must challenge the status quo and invent new solutions.
