

Siya Dilimeni

Construction Training Specialist

Company Description :

Tjeka Training Matters is a Building Construction and Civil Engineering Training Company that has been existence for the past 20 years and provides training all over South Africa and the SADEC countries.

We provide accredited training for the whole construction sector: Building, Civils, Roads, Earthworks, Health & Safety as well as SMME Development.

Your Job Description:

My role is to assist contractors/clients with drawing up of training programmes, implementation and the management thereof. Often Site Agents, Engineers and Contracts Managers don't have time to focus on non-core issues such as training programmes design - we do it all and that's where I come in.

Why did you join L2B?

I knew of L2B from a while ago, but with little knowledge of how the site works and how powerful it is. I took a decision to request a demo/ presentation last year March 2019 and it turned out to be a good decision.

How do you use L2B for your business?

We use L2B to source projects in Africa, key contacts, market intelligence and more.

Recent Awards/Projects:

- SMME Development - Full Learnership for Contractor Development in Eastern Cape.
- Various skills training for 3 projects in Northern Cape (incl. paving, kerbing, V drains, guardrails, fencing, pipe laying).
- Small plant, fencing and kerbing for Eden District Municipality.

Something Lighthearted about You?

I have never driven a TLB and never tried myself on heights either (might be a fear!) and I have one hard hat in my car, another at home and one that I never move or wear anywhere, it's right next to my family photo in my office.
