# MDA Attorneys

## Construction & Technology Law Specialists

### About MDA Attorneys

Providing objective, innovative and practical solutions to contractual and commercial challenges, MDA Attorneys works closely alongside our clients to offer a full range of legal services for large-scale construction and technology projects in Sub-Saharan Africa and worldwide.

We are committed to building long-term relationships with our clients to deliver ongoing value. Our objective and cost-effective approach to the challenges faced by our clients during the project lifecycle sees us tailoring each service offering to satisfy our clients' specific commercial objectives.

Our clients include domestic and international companies involved in major projects in the infrastructure, water management, petrochemical, mining, energy and building sectors.

MDA engages proactively with our clients to design strategies and assist clients in practically managing the implementation of these strategies through:

- reducing the negative impact of challenges on project deliverables;
- minimising the opportunity for risk events arising;
- determining practical solutions to avoid conflict and dispute situations eventuating; and
- dealing with disputes when they arise to achieve the most favourable result for our clients.

### Our Team:

Our team of highly respected lawyers and consultants provide business minded advice to ensure the successful completion of complex construction projects. Our lawyers and consultants have the international qualifications, knowledge and practical experience required to address the on-going pressures inherent to the construction industry.

### How do you make use of L2B?

Subscribed since 2014. Leads 2 Business is used by our Business Development department to track projects from conception, through the tender process to final award.
