

Gary Williams & Paul Heymans - Directors

A little about yourselves:

Gary is a Civil Engineer with over 30 years' experience in the execution of a wide range of complex and challenging civil and building projects in South Africa and the UK. He is responsible for providing strategic leadership, maintaining an open dialogue with stakeholders and driving organisational success.

Paul is a registered professional civil engineer with over 30 years' experience ranging from consulting engineering, construction and post tensioning in the civil and building engineering industries in South Africa and the UK. He is responsible for providing strategic, technical and operational management, while maintaining an open dialogue with stakeholders and driving organisational success.

Company description:

We offer a design, supply and installation service for post-tensioning to the building and civils sectors. Focussing on multi-storey and at-grade applications in the building sector and bridges and reservoirs in the civil sector. Aligned with this is our experience and capacity to execute incrementally launched and stay-cable structures.

When you joined L2B and Why?

We joined L2B in 2019 in order to promote our business and the services we offer to a wider audience, including our existing client base and the new generation of engineers and contractors. L2B has been a valuable tool for us to source new work and to follow up on leads to projects already awarded.

Recent awards or projects?

As a start-up we have been fortunate to have the support of the industry, borne by the number of enquiries and projects that we are involved with currently, for which we are very thankful.

Favourite thing about the Construction Industry?

You'll never get bored in the construction industry, and we have chosen to invest our time and energy here, leading in service, execution and delivery of a quality product every time. Seeing the fruits of our labours and knowing that we are part of creating something meaningful is what drives us.
