

**FEATURED COMPANY
SUBSCRIBER**

DZ AMANZI

Pipeline Systems (Pty) Ltd

DERRICK HALL

About Me :

I've started my career in the Foundry Casting Business selling Municipal Castings since 1993, In 2001 I moved to Pretoria and started my career with Ductile Iron Pipes and been doing it ever since then. So you can say that I've been involved with Civils Industry for 28 years now.

Company Description :

We are Civil Engineering Merchants and specialise in the Ductile Iron Piping, but we also supply steel fabricated fittings, Valves, Couplings and Fabricated Steel Structures.

When & Why did you join L2B?

DZ Amanzi Pipeline Systems joined L2B in 2018 and it has become our most important "Tool" for our business for projects and leads.

How do you make use of L2B?

The most important feature of L2B is the website where you are able to search for projects and receive important details regarding projects and tenders.

Recent Awards/Projects?

In my career we have supplied many Kilometres of piping. The most important and prestigious project must be the supply of 6Km DN1200 & DN800 and D1200, DN800 XTJ Jacking Pipes in Ductile Iron to Western Cape, as it was shipped in the most difficult time during the Pandemic Covid 19 in China, with the vessel literally leaving China a few days before they closed all their Ports. Then the arrival of the pipes in Cape Town Port was just days before South Africa moved into Level 5 Lockdown, we were able to get all these pipes loaded out to site. A lot was a stake for us as company with juggling with time and many Prayers we were able to supply on time. Not only was this a testing project it was also the biggest Diameter of Ductile Iron pipe in South Africa and we are very proud of this project.

Favourite thing about the Construction Industry?

Constantly learning new things may it be new products or installation methods.

Favourite Quote?

"Success is not a final, failure is not fatal, it is courage to continue that counts."
Winston Churchill.
