

Sean Daly - General Manager

About me:

I am a family man with grown up children. I enjoy staying fit and love photographing our South African wildlife.

Company Description:

AMPLIFORM is a manufacturer and stockist of expanded aluminium mesh, flooring and structural beams. The company was established in 1984 in Pietermaritzburg from where we stock and distribute our wide range of products.

When did you join L2B & Why?

We joined L2B in November 2014. Their vast database of projects and professionals was the ideal platform for us to create awareness of our products.

What do you enjoy most about L2B?

The up-to-date data base and their willingness to find further information should it be required.

Recent awards ?

We are not awarded projects through the L2B platform, but use the information it holds to create our own leads.

Favourite part of being involved in the construction industry?

I get a great kick when seeing or reading about projects we have been involved in and knowing that we have contributed to the future safety of the people involved in those projects.

What is your life philosophy?

Be honest with yourself, life is too short.
