

FEATURED COMPANY: Southern Mapping - A Woolpert Company

Jannie Engelke - Program Director

Job Description:

Preparing Proposals to clients. Responsible for the sale, technical requirements & contract of the project, communicating with client and the amending of contract and signing of the contract.

Description of the service you provide:

Geospatial solution provider and aerial survey company specialising in high accuracy LiDAR & Hyperspectral & Thermal surveys, Drone, large format vertical, oblique, as well as a range of satellite imagery products and various remote sensing services.

When you joined L2B and Why?

We joined L2B in January 2013. To enable us to accurately search for tender opportunities in our industry & using L2B platform to search for company details. L2B website is functional to use and their client service is outstanding.

Favourite thing about your Industry?

The exciting chances in Technology with regards to Remote Sensing is challenging and changing our approach to industry solutions all the time. The Geospatial sector and GIS in particular will provide in future a very more direct positive effect on the industry in general.

Accomplishments you are most proud of:

Being part of Mapping Africa and helping to creating the opportunity for positive change.

Something Light-hearted to finish:

Africa is a mixture of first and third world and this diversity provides for many humorous instances.
