Moritz Human, Managing Director

A little about yourself

Constant deadlines in the manufacturing industry can be tiresome, but enjoying nature on the banks of the Vaal River, behind a fishing rod with my two sons, seems to recharge the batteries every time!

Company description:

Road safety is a major concern all over SA. Every year, across the globe, thousands of lives are lost in road accidents. Ever growing traffic on roads requires an operational traffic management system, which can only materialize if it is backed by effective traffic control devices. This is where we come into the picture. We help in filling this gap by offering a comprehensive range of traffic management solutions, products, and services that are extremely beneficial, reliable and affordable.

Manufacturing of Signs for the Road, Mining and Industrial Sector
Road Marking – Thermo Plastic, Solvent and Water Base
Road Safety Products – Cones, Delineators, Speed Humps, Bollards,
Solar Cat Eyes etc..

Why you joined L2B?

Before we joined L2B, we needed a platform to enable the sales representatives to customise their own profile and find leads relevant to our target market. When we joined about 6 months ago, we were elated that such an online platform exists.

How you use L2B for business?

The online search results that are yielded, is a great source to provide the reps with a sales platform to start from. It helps them to get all the online tender information with the click of a button, which saves a lot of precious time and resources.

Recent awards or projects?

Through the years we have supplied numerous SANRAL Contractors with temporary signs and safety products at the beginning of a project and assisted them with Permanent Signs during the maintenance period. Seeing that there are constant time pressures in this type of industry, we are proud that we are always able to manufacture, supply and then meet the required deadline.
