

World-class GRP pipes
& fittings to sustainably
Solve the world's
water and sewer challenges.

FLOWTITE
SOUTH AFRICA

Leading local manufacturer of GRP Pipes

Flowtite South Africa manufactures the world renowned Flowtite Glass Reinforced Polyester Pipes and Fittings. to suit environments using Potable, Raw Marine and Hydro Water, Sewage and Effluent mediums. Our wide range of nominal diameters allows for a variety of standard fittings such as bends, reducers, scour and tee pieces. However our in house design team can assist with your tailor made fittings and manholes suited to your site environment and these are available for the whole Sub Saharan market.

Our continuous filament winding process; which is manufactured to International AWWA C950 and SABS and SANS 1748 Standards; allows us to provide our product to the market at the fastest production rate in the piping industry; at lower transport costs due to it lightweight characteristics. FLOWTITE GRP PIPES are the first choice for Engineers because they are corrosion free and have a proven resistance to acidic environment in water and sewage systems and resistance to corrosion and slime build up is priority in sea water applications. FLOWTITE™ GRP PIPES are the leading product for water, sewage and industrial applications.
