AfriSam
Creating Concrete Possibilities

Company name : AfriSam South Africa (Pty) Ltd

Products offered?

AfriSam is a leading supplier of superior quality construction materials and technical solutions. Our cement, aggregate and readymix concrete construction materials have been contributing significantly to infrastructure development in Africa for more than 87 years.

Industries you market to?

Civil, Construction, CPM, Mining, Hardware Retail.

Benefits & Points of Differentiation

Our national footprint, production capacity and technical expertise make us the perfect partner for any construction project, big or small.

List of projects where your product has been used?

PWC Towers, ZEITZ MOCAA, Katse Dam, Kathu Solar Park, The Leonardo, Norval Foundation, Saldanha Tippler Project, Ingula Storage Scheme, Gautrain.

Where do you have branches?

AfriSam has a national footprint in South Africa, as well as operations in Lesotho and Eswatini.

Company/brand/product statement

We are committed to building a positive African future. It is this passion and commitment that we are most proud of, not of the products we make, but rather of what our products make possible – we create concrete possibilities.

Our products are produced locally.

We are a proud member of the Green Building Council of South Africa and a leader in sustainability for our industry.

All our bagged cement products carry the SABS mark and we indicate the relevant product specific carbon footprint.

AfriSam’s SANAS accredited Roodepoort laboratory provides a high level of technical support.
