C.I.S Engineering (Pty) Ltd

About Gerrie

Gerrie Meijer is a Estimator at C I S Engineering (Pty) Ltd. Gerrie is married with a 4 year old son and is a sports enthusiast that loves the outdoors. Gerrie is always learning new processes and “tricks of the trade” around every corner, and for him knowledge is what defines a person.

About The Company

C.I.S Engineering (Pty) Ltd started trading in 1998 as Central Information Services, in Vereeniging. The company was restructured into C.I.S Engineering in 2007 and forms part of the Structa Group of Companies.

Our premises occupy a combined area of 35,100m², which includes: A dispatch area of 15,000m², An undercover roof overhead crane area of 10,100m², An administrative area of 1,000m², An open space area of 9,000m².

The plant houses dedicated modern mast tower and steel manufacturing equipment, while design facilities include a full 3D CAD capability and all in-house designs are approved by professional engineers.

Industries

C.I.S Engineering focusses on the manufacturing of light to heavy steel structures for the telecommunications and power industry sectors.

Products & Services

- Design, Manufacture and Install Structural Steelwork
- Substation Steelwork
- Communication Towers
- Electricity Pylons

What makes C.I.S Engineering unique

C.I.S Engineering will strive to be the preferred supplier of mast and structural steel structures in South Africa, by continuously improving our skill base, use of cutting edge technology and best production practices and thus exceeding our client’s specifications and expectations. This vision will further underpin our drive for sustainable profitable growth with maximum returns to stakeholders.

Recent awards or projects?

We supplied the Steel Distribution Monopoles for Karusa Wind Farm naming one, and CIS is the preferred Monopole Manufacturer in RSA due to our excellent workmanship and great service.

Favourite thing about working in the Construction Industry?

Always a challenge, I love being challenged.
