# Directech Industrial Mechatronic Solutions

## About the Company

In an ever-changing world full of new technology, Directech is leading the way towards an automated future. A future in which production efficiencies and quality standards are attained through the intelligent application of mechanics, electronics, intralogistics, and robotics. A future in which people and machines work together to shape and improve our world.

## Industries

Today Directech's unique style of technology can be found in more than 100 applications across Southern Africa in various industries including but not limited to: Automotive, Laboratory, Food & Beverage, Logistics, Material Handling, Rail, Manufacturing and Petrochemical.

## Products & Services

Directech specialises in bespoke industrial automated turnkey solutions, comprising of robotics, purpose-built machinery, automated factory solutions, automated guided vehicles, packaging solutions, telemetry - smart factory & city systems, aluminium building kit solutions, automated torque tools, spray-painting solutions and so much more.

## What makes Directech unique?

What makes Directech unique is our approach to projects based on our advanced skill sets. Every project is designed and manufactured internally with the use of our state-of-the-art equipment. Directech's engineers work only with the best automation and design software and the company boasts an entire warehouse of specialised production machinery including toolrooms, paint booths, laser cutting and CNC machinery. Our capabilities even extend to the manufacturing of electrical cabinets, software development and programming, all completed in-house.

Directech encounter customers from all over the world, with partnerships in countries including Germany, Japan, the UK, America, and Austria. Throughout the years the company has been recognized by the industry and customers alike with awards from the department of science and technology, leading automotive manufacturers, and more.

What distinguishes Directech is our ability to intricately understand and exceed your unique needs and expectations, by living up to our motto "Impossible is an Opinion".

## Where do you have branches?

The Directech head office is based in Johannesburg, with additional branches in Durban and Cape town. After 28 years of operating in Africa, the Directech Group have broadened our global horizons in 2020 through the acquisition of Peak Analysis & Automation (PAA), located in Farnborough, UK, as well as Peak Robotics, based in Colorado, USA.
